

Rat BDNF (Brain Derived Neurotrophic Factor) ELISA Kit

Catalog No: tcee4642

Available Sizes

Size: 96T

Specifications

Research Area:

Metabolism, Neuroscience, Cardiovascular, Cancer

Species Reactivity:

Rat

Sample Type:

serum, plasma and other biological fluids; 100μL

Assay Type:

Sandwich

Sensitivity:

18.75pg/mL

Detection Range:

31.25~2000pg/mL

Assay Time:

3.5h

Detection Method:

Sandwich-Ab

Tested Application:

ELISA

Storage Instruction:

An unopened kit can be stored at 4°C for 1 month. If the kit is not used within 1 month, store the items separately according to the detailed information on the manual once the kit is received

Alternative Names:

ANON2, BULN2

SwissProt:

P23363

Product Description

This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat BDNF. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat BDNF and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat BDNF, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Rat BDNF. You can calculate the concentration of Rat BDNF in the samples by comparing the OD of the samples to the standard curve.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
