

Pirazolac

Catalog No: tcsc0018134

Available Sizes

Size: 1mg

Size: 5mg

Size: 10mg

Specifications

CAS No:

71002-09-0

Formula:

$C_{17}H_{12}ClFN_2O_2$

Pathway:

Others

Target:

Others

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Alternative Names:

ZK-76604

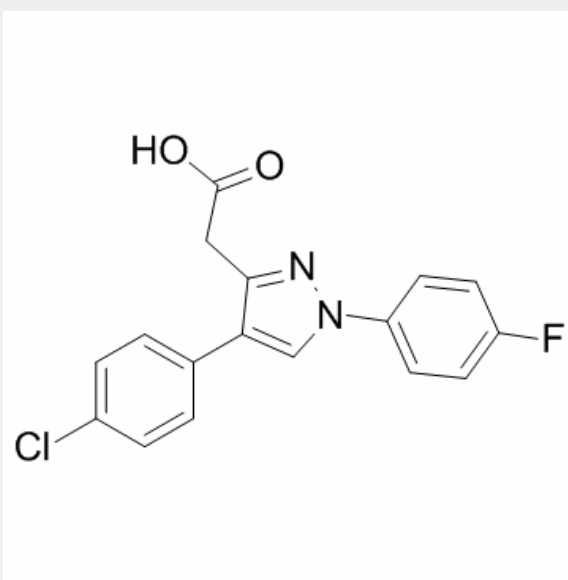

Observed Molecular Weight:

330.74

Product Description

Pirazolac is a non-steroidal anti-inflammatory drug.

In Vitro: Pirazolac is a non-steroidal anti-inflammatory drug. Pirazolac concentration-relatedly inhibits the accumulation of prostanoids in incubates of human gastric mucosa, but this inhibition is less than that by indomethacin and other commonly used non-steroidal anti-inflammatory drugs. This difference may explain the claim that Pirazolac is less damaging to the stomach^[1].
