

BMY-25271

Catalog No: tcsc0018185

Available Sizes			
Size: 1mg			
Size: 5mg			
Size: 10mg			
Specifications			
CAS No: 78441-82-4			
Formula: C ₁₂ H ₁₉ N ₅ O ₂ S ₂			
Pathway: Immunology/Inflammation;GPCR/G Prote	ein		
Target: Histamine Receptor;Histamine Receptor			
Purity / Grade: >98%			
Solubility: 10 mM in DMSO			

Product Description

Observed Molecular Weight:

BMY-25271 is a **histamine H2 receptor** antagonist.

IC50 & Target: Histamine H2 receptor^[1]

In Vivo:

329.44

BMY-25271 is a histamine H2 receptor antagonist. The dose response curves are parallel and oral ED_{50} values derived from probit analysis are 0.093, 0.97 and 6.9 mg/kg for BMY-25271, ranitidine and cimetidine, respectively. BMY-25271, therefore, is about 10 and 74 times more potent than ranitidine and cimetidine, respectively. Pretreatment with the highest dose of BMY-25271 does not significantly affect the absorption of aspirin or the formation of its major metabolite, salicylic acid^[1].
