

# Alosetron ( (Z) -2-butenedioate)

**Catalog No: tcsc0641**

## Available Sizes

**Size:** 10mg

**Size:** 50mg

## Specifications

**CAS No:**

122852-43-1

**Formula:**

$C_{21}H_{22}N_4O_5$

**Pathway:**

Neuronal Signaling;GPCR/G Protein

**Target:**

5-HT Receptor;5-HT Receptor

**Purity / Grade:**

>98%

**Solubility:**

10 mM in DMSO

**Alternative Names:**

GR 68755;GR 68755X

**Observed Molecular Weight:**

410.42

## Product Description

Alosetron is a Serotonin 5HT3-receptor antagonist that is used in treatment of irritable bowel syndrome.

IC50 Value: N/A

Target: 5-HT Receptor

Alosetron has an antagonist action on the 5-HT<sub>3</sub> receptors of the enteric nervous system of the gastrointestinal tract. While being a 5-HT<sub>3</sub> antagonist like ondansetron, it is not classified or approved as an antiemetic. Since stimulation of 5-HT<sub>3</sub> receptors is positively correlated with gastrointestinal motility, alosetron's 5-HT<sub>3</sub> antagonism slows the movement of fecal matter through the large intestine, increasing the extent to which water is absorbed, and decreasing the moisture and volume of the remaining waste products.
