

Alosetron (Hydrochloride)

Catalog No: tcsc0642

Available Sizes

Size: 10mg

Size: 50mg

Size: 100mg

Specifications

CAS No:

122852-69-1

Formula:

$C_{17}H_{19}ClN_4O$

Pathway:

Neuronal Signaling;GPCR/G Protein

Target:

5-HT Receptor;5-HT Receptor

Purity / Grade:

>98%

Solubility:

DMSO 300.0 mg/ml (1139.8mM) Warming

Water 25.0mg/ml (95.0mM) Warming

Alternative Names:

GR 68755C;GR 68755;GR 68755X

Observed Molecular Weight:

330.81

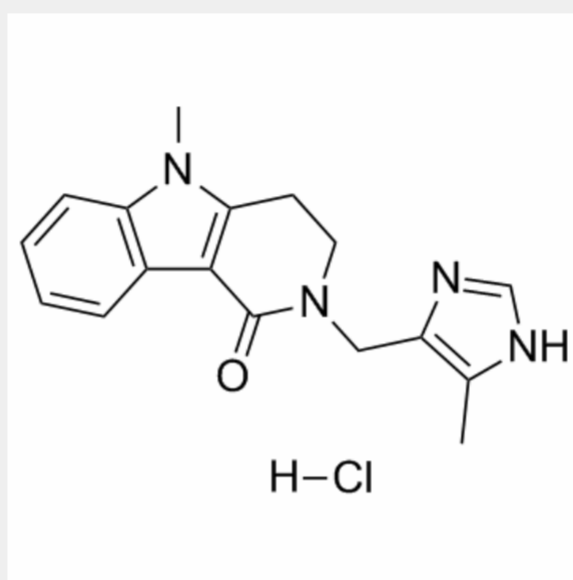

Product Description

Alosetron Hcl is a Serotonin 5HT3-receptor antagonist that is used in treatment of irritable bowel syndrome.

IC50 Value:

Target: 5-HT Receptor

Alosetron has an antagonist action on the 5-HT3 receptors of the enteric nervous system of the gastrointestinal tract. While being a 5-HT3 antagonist like ondansetron, it is not classified or approved as an antiemetic. Since stimulation of 5-HT3 receptors is positively correlated with gastrointestinal motility, alosetron's 5-HT3 antagonism slows the movement of fecal matter through the large intestine, increasing the extent to which water is absorbed, and decreasing the moisture and volume of the remaining waste products.
