

# Dexrazoxane hydrochloride

Catalog No: tcsc0767

## Available Sizes

**Size:** 10mg

**Size:** 50mg

**Size:** 100mg

## Specifications

**CAS No:**

149003-01-0

**Formula:**

N/A

**Pathway:**

Others

**Target:**

Others

**Purity / Grade:**

>98%

**Solubility:**

10 mM in DMSO

**Alternative Names:**

ICRF-187 hydrochloride;ADR-529 Hydrochloride

**Observed Molecular Weight:**

1000

## Product Description

Dexrazoxane Hcl( ICRF-187 Hcl) is a cardioprotective agent.

IC50 value:

Target: cardioprotective agent

As a derivative of EDTA, dexrazoxane chelates iron, thus reduce the number of metal ions complexed with anthracycline and, consequently, decrease the formation of superoxide radicals. This agent is used to protect the heart against the cardiotoxic side effects of anthracyclines, such as doxorubicin. It was speculated that dexrazoxane could be used for further investigation to synthesize new antimalarial drugs.
