

Diphenmanil (methysulfate)

Catalog No: tcsc0906

Available Sizes

Size: 10mg

Size: 50mg

Specifications

CAS No:

62-97-5

Formula:

$C_{21}H_{27}NO_4S$

Pathway:

Neuronal Signaling;GPCR/G Protein

Target:

mAChR;mAChR

Purity / Grade:

>98%

Solubility:

: 16.67 mg/mL (42.80 mM; Need ultrasonic)

Alternative Names:

Diphemanil mesylate

Observed Molecular Weight:

389.51

Product Description

Diphemanil methysulfate is a quaternary ammonium anticholinergic. It binds muscarinic acetylcholine receptors and thereby decreases secretory excretion of stomach acids as well as saliva and sweat.

IC50 value:

Target: mAChR

Diphepanil Methylsulfate exerts its action by primarily binding the muscarinic M3 receptor. M3 receptors are located in the smooth muscles of the blood vessels, as well as in the lungs. This means they cause vasodilation and bronchoconstriction. They are also in the smooth muscles of the gastrointestinal tract (GIT), which help in increasing intestinal motility and dilating sphincters. The M3 receptors are also located in many glands which help to stimulate secretion in salivary glands and other glands of the body.
