

## Rivastigmine

**Catalog No: tcsc0946** 

Available Sizes
Size: 50mg
Size: 100mg
Size: 200mg
Size: 500mg
Specifications
CAS No: 123441-03-2
Formula: ${\rm C_{14}^{\rm H}_{22}^{\rm N}_2^{\rm O}_2}$
Pathway: Neuronal Signaling
<b>Target:</b> AChE
Purity / Grade: >98%
<b>Solubility:</b> DMSO : ≥ 50 mg/mL (199.73 mM)
Alternative Names: S-Rivastigmine
Observed Molecular Weight: 250.34

## **Product Description**

Rivastigmine, an cholinesterase inhibitor(IC50= 5.5 uM), inhibits both butyrylcholinesterase and acetylcholinesterase

IC50 value: 5.5 uM

Target: AChE

Rivastigmine is a parasympathomimetic or cholinergic agent for the treatment of mild to moderate dementia of the Alzheimer\'s type and dementia due to Parkinson\'s disease. The drug can be administered orally or via a transdermal patch; the latter form reduces the prevalence of side effects, which typically include nausea and vomiting. The drug is eliminated through the urine, and appears to have relatively few drug-drug interactions. Rivastigmine, a cholinesterase inhibitor, inhibits both butyrylcholinesterase and acetylcholinesterase. It is thought to work by inhibiting these cholinesterase enzymes, which would otherwise break down the brain chemical acetylcholine.
