

Sobetirome

Catalog No: tcsc0956

Available Sizes

Size: 5mg

Size: 10mg

Size: 50mg

Specifications

CAS No:

211110-63-3

Formula:

C₂₀H₂₄O₄

Pathway:

Others

Target: Thyroid Hormone Receptor

Purity / Grade:

Solubility: DMSO : 9.85 mg/mL (29.99 mM; Need ultrasonic)

Alternative Names:

GC-1; QRX-431

Observed Molecular Weight:

328.4

Product Description

Copyright 2021 Taiclone Biotech Corp.

Sobetirome is a thyroid hormone receptor β (**TR** β)-specific agonist which bind selectively to **TR** β -**1** with an **EC**₅₀ of 0.16 μ M.

IC50 & Target: EC50: 0.16 μM (TRβ-1), 0.58 μM (TRα-1)^[1]

In Vivo: Sobetirome (GC-1) is a thyroid hormone receptor β (TR β)- and liver uptake-selective agonist. Sobetirome (48 nmol/kg) reduces high-density lipoprotein (HDL) cholesterol and very low-density lipoprotein (VLDL) triglyceride levels in euthyroid Mice. Sobetirome reduces HDL cholesterol and triglyceride Levels in hypercholesterolemic mice. Sobetirome increases hepatic HDL receptors and stimulates bile acid synthesis in hypercholesterolemic mice^[2]. Treatment with 10× Sobetirome (GC-1) results in a gain of fat mass of only 21% (1.7 g), and treatment with 20× Sobetirome (GC-1) induces a decrease in fat mass of 20% (1.3 g)^[3].
