

# Tyrphostin A9

## Catalog No: tcsc1033

### Available Sizes

**Size:** 50mg

### Specifications

**CAS No:**

10537-47-0

**Formula:**

$C_{18}H_{22}N_2O$

**Pathway:**

Protein Tyrosine Kinase/RTK

**Target:**

VEGFR

**Purity / Grade:**

>98%

**Solubility:**

H<sub>2</sub>O :

**Alternative Names:**

AG 17;Tyrphostin 9

**Observed Molecular Weight:**

282.38

## Product Description

Tyrphostin A9(AG 17), a tyrosine kinase inhibitor, is a potent inducer of mitochondrial fission. Tyrphostin A9 emerged as the most potent and selective of 51 tyrosine kinase inhibitors tested against the TNF-induced respiratory burst.

IC<sub>50</sub> value:

Target: Multi tyrosine kinase

Tyrphostin A9 inhibited TNF-induced tyrosine phosphorylation of pyk2 without blocking the cells' bactericidal activity. Tyrphostin A9 is a PDGF receptor tyrosine kinase inhibitor ( $IC_{50} = 500$  nM). Recent findings suggest that signaling via PDGF receptor tyrosine kinases is not necessary for the shift of the smooth muscle cells from a contractile to a synthetic phenotype. On the other hand these enzymes apparently carry out important functions in the control of intracellular membrane traffic and cell division.
