

Butenafine (Hydrochloride)

Catalog No: tcsc1124

Available Sizes

Size: 500mg

Size: 1g

Size: 5g

Specifications

CAS No:

101827-46-7

Formula:

$C_{23}H_{28}ClN$

Pathway:

Anti-infection

Target:

Fungal

Purity / Grade:

>98%

Solubility:

H₂O : 1 mg/mL (2.83 mM; Need ultrasonic); DMSO : 25 mg/mL (70.64 mM; Need ultrasonic)

Alternative Names:

KP363 (Hydrochloride)

Observed Molecular Weight:

353.93

Product Description

Butenafine Hydrochloride (KP363 Hydrochloride) is a synthetic benzylamine antifungal, works by inhibiting the synthesis of sterols by inhibiting squalene epoxidase.

IC50 & Target: Antifungal; squalene epoxidase

In Vitro: Butenafine Hydrochloride, a benzylamine derivative, is an antifungal which is used to control dermal fungal infections such as athlete's foot and ring worm. Butenafine Hydrochloride is squalene epoxidase inhibitor, inhibits the synthesis of ergosterol needed in fungal cell membranes. The drug has excellent penetration into the epidermis and a prolonged retention time following topical application, conferring residual therapeutic activity after treatment cessation. Butenafine possesses anti-inflammatory activity too. Butenafine hydrochloride 1% cream is safe and effective for tinea corporis cruris and tinea manuum pedis.
