

Racecadotril

Catalog No: tcsc1127

Available Sizes

Size: 200mg

Size: 1g

Specifications

CAS No:

81110-73-8

Formula:

$C_{21}H_{23}NO_4S$

Pathway:

Metabolic Enzyme/Protease

Target:

Nepilysin

Purity / Grade:

>98%

Solubility:

DMSO : ≥ 100 mg/mL (259.42 mM); H₂O :

Alternative Names:

Acetorphan

Observed Molecular Weight:

385.48

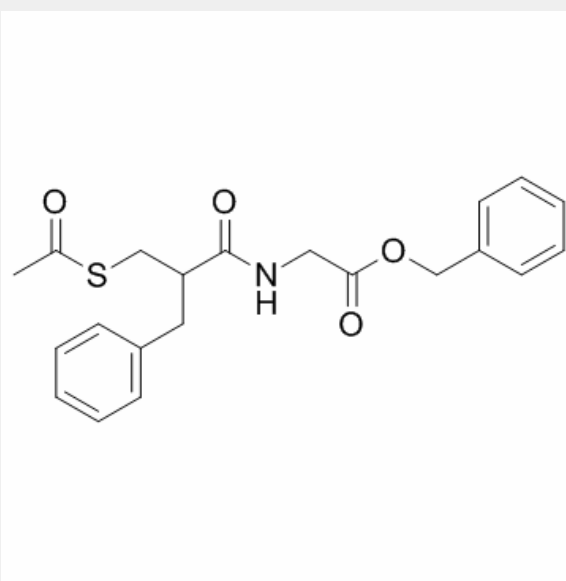

Product Description

Racecadotril (acetorphan), a potent enkephalinase inhibitor (IC₅₀= 4.5 uM), protects endogenous enkephalins from degradation.

IC50 value: 4.5 uM

Target: Enkephalinase

Racecadotril is a peripherally acting enkephalinase inhibitor with an IC50 of 4.5 uM. Unlike other medications used to treat diarrhea, which reduce intestinal motility, Racecadotril has an antisecretory effect-it reduces the secretion of water and electrolytes into the intestine. A small randomized controlled trial found Racecadotril to significantly reduce the duration and volume of watery diarrhea in children when given as an adjunct to oral rehydration therapy.
