

Otenabant (Hydrochloride)

Catalog No: tcsc1278

Available Sizes	
Size: 5mg	
Size: 10mg	
Size: 50mg	
Specifications	
CAS No: 686347-12-6	
Formula: C ₂₅ H ₂₆ Cl ₃ N ₇ O	
Pathway: GPCR/G Protein	
Target: Cannabinoid Receptor	
Purity / Grade: >98%	
Solubility: 10 mM in DMSO	
Alternative Names: CP 945598 Hydrochloride	
Observed Molecular Weight: 546.88	
Product Description	

Otenabant Hydrochloride is a potent and selective **cannabinoid receptor CB1** antagonist with $\mathbf{K_i}$ of 0.7 nM, exhibits 10,000-fold greater selectivity against human CB2 receptor.

IC50 & Target: Ki: 0.7 nM (CB1)

In Vitro: Otenabant HCl has low affinity with K_i of 7.6 μ M for human CB2 receptors^[1]. Otenabant HCl inhibits CB1 receptor with moderate unbound microsomal clearance, low hERG affinity, and adequate CNS penetration^[2].

In Vivo: Otenabant acutely stimulates energy expenditure in rats and decreases the respiratory quotient indicating a metabolic switch to increased fat oxidation. Otenabant (10 mg/kg, p.o.) promotes a 9%, vehicle adjusted weight loss in a 10 day weight loss study in diet-induced obese mice^[1]. Otenabant HCl reverses four cannabinoid agonistmediated behaviors (locomotor activity, hypothermia, analgesia, and catalepsy) following administration of the synthetic CB1 receptor agonist CP-55940. Otenabant HCl exhibits dose-dependent anorectic activity in a model of acute food intake in rodents and increased energy expenditure and fat oxidation^[2].
