Product Description

Bavisant Hcl (JNJ-31001074) is a highly selective, orally active antagonist of the human H3 receptor with a novel mechanism of

action, involving wakefulness and cognition, with potential as a treatment for ADHD.

IC50 Value:

Target: H3 receptor

in vitro: Bavisant completed a phase II ADHD trial, but no results have been reported [1].

in vivo: Mean change from baseline in the total ADHD-RS-IV score at day 42 (primary efficacy endpoint) was -8.8 in the placebo group versus -9.3, -11.2 and -12.2 in the bavisant 1 mg/day, 3 mg/day and 10 mg/day groups, respectively; the change in the 10 mg/day group was not statistically superior to placebo ($p=0.161$), and hence statistical comparisons of the 1 mg/day and 3 mg/day groups with placebo based on a step-down closed testing procedure were not performed [2].

Clinical trial: A Study to Characterize the Pharmacokinetics and Effect of Food on JNJ-31001074 in Healthy Volunteers. Phase 2
