

NU 7026

Catalog No: tcsc1532

Available Sizes

Size: 5mg

Size: 10mg

Size: 50mg

Specifications

CAS No:

154447-35-5

Formula:

C₁₇H₁₅NO₃

Pathway: PI3K/Akt/mTOR;Cell Cycle/DNA Damage

Target:

DNA-PK;DNA-PK

Purity / Grade:

Solubility: DMSO : 2.9 mg/mL (10.31 mM; Need ultrasonic)

Alternative Names:

DNA-PK Inhibitor II;LY293646

Observed Molecular Weight:

281.31

Product Description

Copyright 2021 Taiclone Biotech Corp.

NU 7026 is a novel specific **DNA-PK** inhibitor with IC_{50} of 0.23±0.01 µM, also inhibits **PI3K** with IC_{50} of 13±3 µM.

IC50 & Target: IC50: 0.23±0.01 μM (DNA-PK), 13±3 μM (PI3K)^[1]

In Vitro: NU7026 (10 μ M) potentiates ionizing radiation (IR) cytotoxicity [potentiation factor at 90% cell kill (PF₉₀)=1.51±0.04] in exponentially growing DNA-PK proficient but not deficient cells^[1]. NU7026 synergistically sensitizes I83 cells to Chlorambucil (CLB) 3.5-fold^[2].NU7026, a novel inhibitor of the DNA repair enzyme DNA-dependent protein kinase (DNA-PK). At a dose of 10 μ M, which is nontoxic to cells *per se*, a minimum NU7026 exposure of 4 h in combination with 3 Gy radiation is required for a significant radiosensitisation effect in CH1 human ovarian cancer cells^[3].

In Vivo: NU7026, a novel inhibitor of the DNA repair enzyme DNA-dependent protein kinase (DNA-PK). Following intravenous administration to mice at 5 mg/kg, NU7026 underwent rapid plasma clearance (0.108 L/h) and this is largely attributed to extensive metabolism. Bioavailability following interperitoneal (i.p.) and p.o. administration at 20 mg/kg is 20 and 15%, respectively^[3].
