

Perindopril

Catalog No: tcsc1903

Available Sizes

Size: 100mg

Size: 500mg

Specifications

CAS No:
82834-16-0

Formula:
 $C_{19}H_{32}N_2O_5$

Pathway:
Metabolic Enzyme/Protease

Target:
Angiotensin-converting Enzyme (ACE)

Purity / Grade:
>98%

Solubility:
10 mM in DMSO

Alternative Names:
S-9490

Observed Molecular Weight:
368.47

Product Description

Perindopril is a long-acting ACE inhibitor of which is used to treat high blood pressure, heart failure or stable coronary artery disease.

Target: ACE

Perindopril is a long-acting ACE inhibitor. It is used to treat high blood pressure, heart failure or stable coronary artery disease in form of perindopril arginine (trade names include Coversyl, Coversum) or perindopril erbumine (trade name Aceon). According to the Australian government's Pharmaceutical Benefits Scheme website, based on data provided to the Australian Department of Health and Aging by the manufacturer, perindopril arginine and perindopril erbumine are therapeutically equivalent and may be interchanged without differences in clinical effect. However the dose prescribed to achieve the same effect will differ due to different molecular weights for the two forms.

Perindopril is one of the most prescribed inhibitors of angiotensin converting enzyme, has a large evidence base, which allows to use it in patients with hypertension, diabetes mellitus type 2, coronary heart disease and chronic heart failure. In this review, the author focused on the evidence of organoprotecting properties of perindopril that lie outside lowering blood pressure.
