

Cefoselis (hydrochloride)

Catalog No: tcsc2074

Available Sizes

Size: 5mg

Size: 10mg

Size: 50mg

Size: 100mg

Specifications

CAS No:

911212-25-4

Formula:

$C_{19}H_{23}ClN_8O_6S_2$

Pathway:

Anti-infection

Target:

Bacterial

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Observed Molecular Weight:

559.02

Product Description

Cefoselis is a widely used beta-lactam antibiotic.

Target: Antibacterial

Cefoselis, a new parenteral cephalosporin, was active against clinical isolates of both gram-positive and gram-negative aerobic bacteria. The activity of Cefoselis was similar to that of cefpirome and cefepime and generally superior to that of ceftazidime. Cefoselis showed potent antibacterial activity against *Hemophilus influenzae* and *Moraxella catarrhalis*. Cefoselis was highly active against MSSA and MSCNS. Cefoselis was poor in the activity against MRSA, MRCNS, PRSP and *Enterococcus faecalis*, and no activity for *Enterococcus faecium*.
