

Calcium N5-methyltetrahydrofolate

Catalog No: tcsc2467

Available Sizes

Size: 5mg

Size: 10mg

Size: 50mg

Size: 100mg

Specifications

CAS No:

26560-38-3

Formula:

$C_{20}H_{23}CaN_7O_6$

Pathway:

Cell Cycle/DNA Damage

Target:

Antifolate

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Alternative Names:

NSC173328

Observed Molecular Weight:

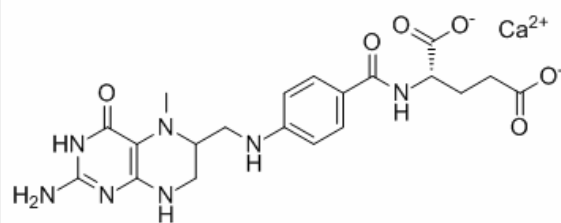

497.52

Product Description

Calcium N5-methyltetrahydrofolate(NSC173328) is the calcium salt of levomefolic acid, which has been proposed for treatment of cardiovascular disease and advanced cancers such as breast and colorectal cancers.

IC50 value:
