

# Ethisterone

Catalog No: tcsc2603

## Available Sizes

**Size:** 100mg

**Size:** 500mg

## Specifications

**CAS No:**

434-03-7

**Formula:**

$C_{21}H_{28}O_2$

**Pathway:**

Others

**Target:**

Estrogen Receptor/ERR

**Purity / Grade:**

>98%

**Solubility:**

DMSO:

**Alternative Names:**

Pregneninolone;17 $\alpha$ -Ethynyltestosterone

**Observed Molecular Weight:**

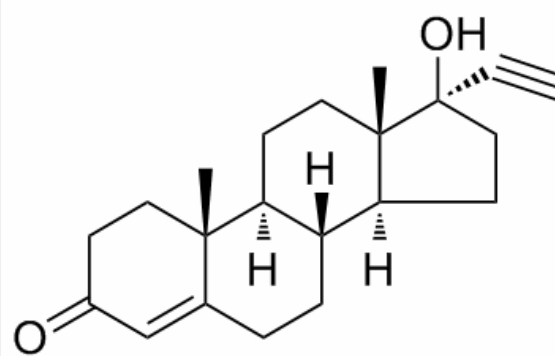

312.45

## Product Description

Ethisterone is a progestogen hormone being considered to treat prostate cancer.

Target: Estrogen Receptor/ERR

Ethisterone is the first orally active progestin, ethisterone (pregneninolone, 17 $\alpha$ -ethynyltestosterone or 19-norandrostane), the 17 $\alpha$ -ethynyl analog of testosterone, was synthesized in 1938 by Hans Herloff Inhoffen, Willy Logemann, Walter Hohlweg, and Arthur Serini at Schering AG in Berlin and marketed in Germany in 1939 as Proluton C and by Schering in the U.S. in 1945 as Pranone.
