

Travoprost

Catalog No: tcsc2773

Available Sizes

Size: 1mg

Size: 5mg

Size: 10mg

Size: 25mg

Size: 50mg

Specifications

CAS No:

157283-68-6

Formula:

$C_{26}H_{35}F_3O_6$

Pathway:

GPCR/G Protein

Target:

Prostaglandin Receptor

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Alternative Names:

Fluprostenol isopropyl ester;AL6221;Flu-lpr

Observed Molecular Weight:

500.55

Product Description

Travoprost is used to treat glaucoma and ocular hypertension.

Target: Others

Travoprost ophthalmic solution is a topical medication used for controlling the progression of glaucoma or ocular hypertension, by reducing intraocular pressure. It is a synthetic prostaglandin analog (or more specifically, an analog of prostaglandin F_{2α}) that works by increasing the outflow of aqueous fluid from the eyes. From Wikipedia.
