

# Sivelestat

Catalog No: **tcsc2919**

## Available Sizes

**Size:** 10mg

**Size:** 50mg

## Specifications

**CAS No:**

127373-66-4

**Formula:**

$C_{20}H_{22}N_2O_7S$

**Pathway:**

Metabolic Enzyme/Protease

**Target:**

Elastase

**Purity / Grade:**

>98%

**Solubility:**

DMSO :  $\geq 100$  mg/mL (230.17 mM)

**Alternative Names:**

EI546;LY544349;ONO5046

**Observed Molecular Weight:**

434.46

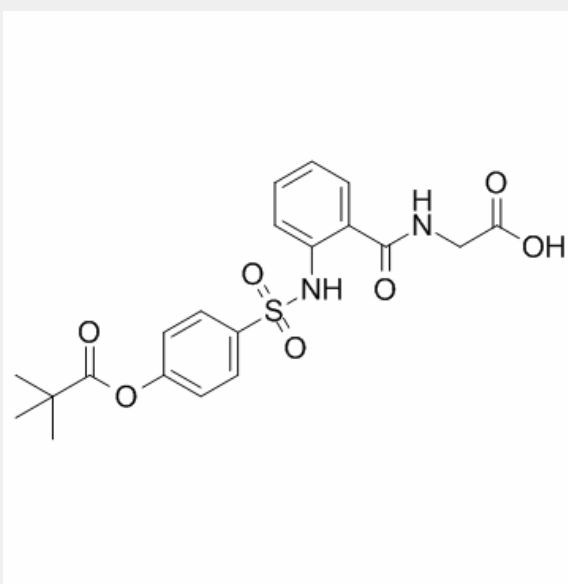

## Product Description

Sivelestat(ONO5046; LY544349; EI546) is a competitive inhibitor of human neutrophil elastase(IC<sub>50</sub> = 44 nM; K<sub>i</sub>=200 nM); also inhibited leukocyte elastase obtained from rabbit, rat, hamster and mouse.

IC50 value: 44 nM [1]

Target: neutrophil elastase

ONO-5046 did not inhibit trypsin, thrombin, plasmin, plasma kallikrein, pancreas kallikrein, chymotrypsin and cathepsin G even at 100 microM. In in vivo studies, ONO-5046 suppressed lung hemorrhage in hamster (ID50 = 82 micrograms/kg) by intratracheal administration and increase of skin capillary permeability in guinea pig (ID50 = 9.6 mg/kg) by intravenous administration, both of which were induced by human neutrophil elastase [1]. Sivelestat sodium hydrate is an anti-neutrophil elastase inhibitor and may be one of the treatment options for acute respiratory failure due to pneumocystis pneumonia in AIDS patients [2].
