

6-Maleimidohexanoic acid N-hydroxysuccinimide ester

Catalog No: tcsc2995

Available Sizes

Size: 10mg

Size: 50mg

Size: 100mg

Size: 500mg

Specifications

CAS No:

55750-63-5

Formula:

$C_{14}H_{16}N_2O_6$

Pathway:

Antibody-drug Conjugate/ADC Related

Target:

ADC Linker

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Alternative Names:

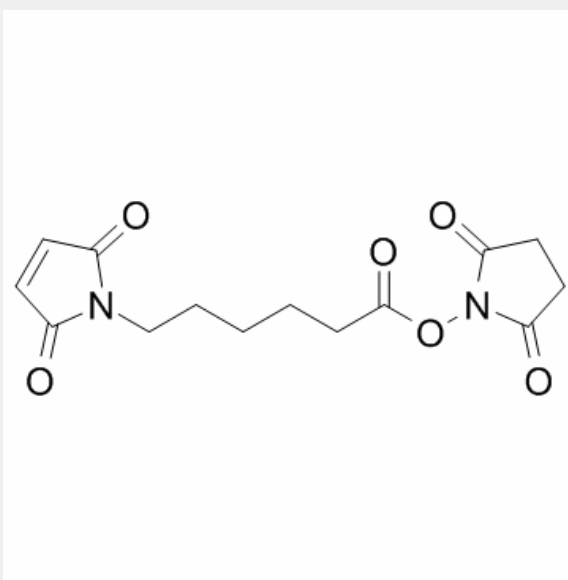

EMCS

Observed Molecular Weight:

308.29

Product Description

6-Maleimidohexanoic acid N-hydroxysuccinimide ester(ECMS) is a useful protective group in antibody drug conjugates.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
