relief of various skin conditions, including rashes.

IC50 value:

Target:

When using desoximetasone, some of the medication may be absorbed through the skin and into the bloodstream. Too much absorption can lead to unwanted side effects elsewhere in the body. To keep this problem to a minimum, avoid using large amounts of desoximetasone over large areas, do not use it for extended periods of time, and do not cover it with airtight dressings such as plastic wrap or adhesive bandages unless specifically told to by your doctor.[1] Children may absorb more medication than adults do. Desoximetasone is for use only on the skin and should be kept out of the eyes.
