

5 (6) -FAM SE

Catalog No: tcsc3061

Available Sizes

Size: 10mg

Size: 50mg

Size: 100mg

Specifications

CAS No:

117548-22-8

Formula:

$C_{25}H_{15}NO_9$

Pathway:

Others

Target:

Others

Purity / Grade:

>98%

Solubility:

DMSO : 14.3 mg/mL (30.21 mM; Need ultrasonic and warming); H2O : $\geq$ 36 mg/mL (76.05 mM)

Alternative Names:

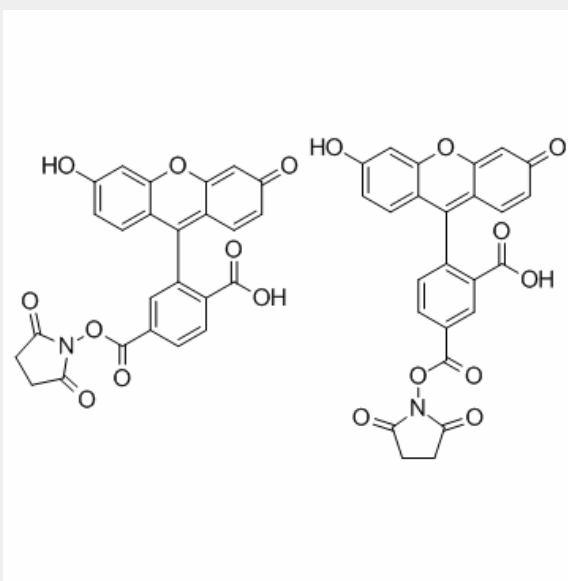

5(6)-Carboxyfluorescein N-hydroxysuccinimide ester;FLUOS;5(6)-Carboxyfluorescein succinimidyl ester mixed isomers

Observed Molecular Weight:

473.39

Product Description

5(6)-FAM SE is an amine-reactive green fluorescent dye widely used for labeling proteins or other molecules that contain a primary or secondary aliphatic amine.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
