

Pneumocandin B0

Catalog No: tcsc3247

Available Sizes

Size: 1mg

Size: 5mg

Size: 10mg

Specifications

CAS No:

135575-42-7

Formula:

$C_{50}H_{80}N_8O_{17}$

Pathway:

Anti-infection

Target:

Fungal

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Alternative Names:

L-688786

Observed Molecular Weight:

1065.21

Product Description

Pneumocandin B0(L-688786), a key intermediate in the synthesis of the antifungal agent, Cancidas, has led to the identification of several materials with potential for improved performance.
