

Sipeimine

Catalog No: tcsc3729

Available Sizes

Size: 5mg

Size: 10mg

Specifications

CAS No:

61825-98-7

Formula:

$C_{27}H_{43}NO_3$

Pathway:

Others

Target:

Others

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Alternative Names:

Imperialine

Observed Molecular Weight:

429.64

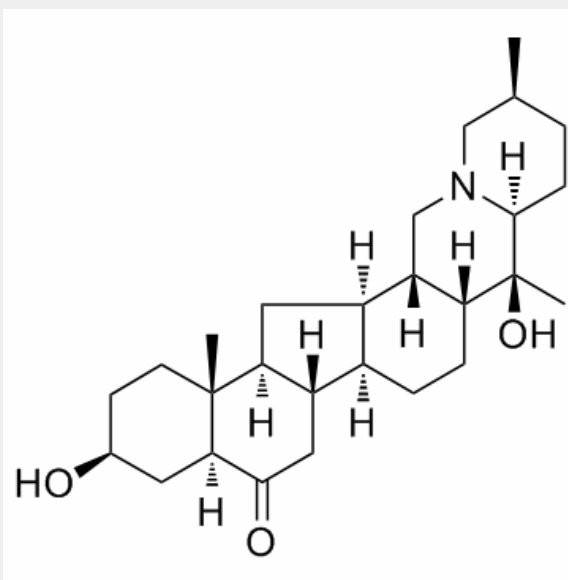

Product Description

Sipeimine is a natural product isolated from *Fritillaria ussuriensis*.

Target:

In vitro: Sipeimine can induce rejuvenation of a endophytic fungus; Sipeimine yield of the strain rejuvenated by adding 3% bulbus was effectively improved to 0.0563 mg/L and it is 21.9% higher than that of the initial strain [1].

In vivo:

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
