

# Hetacillin

Catalog No: tcsc4870

## Available Sizes

**Size:** 50mg

## Specifications

**CAS No:**

3511-16-8

**Formula:**

$C_{19}H_{23}N_3O_4S$

**Pathway:**

Anti-infection

**Target:**

Bacterial

**Purity / Grade:**

>98%

**Solubility:**

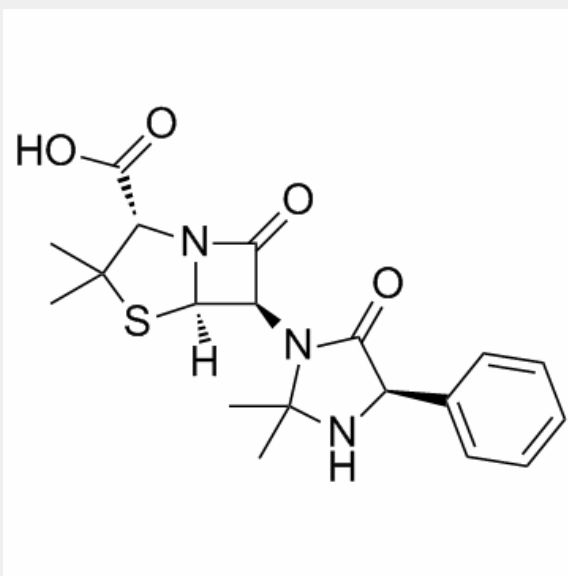

10 mM in DMSO

**Observed Molecular Weight:**

389.47

## Product Description

Hetacillin is a beta-lactam antibiotic that is part of the aminopenicillin family. It is a prodrug and it has no antibacterial activity itself, but quickly splits of acetone in the human body to form ampicillin, which is active against a variety of bacteria.
