

Taranabant ((1R,2R) stereoisomer)

Catalog No: tcsc6116

Available Sizes

Size: 2mg

Size: 5mg

Size: 10mg

Specifications

CAS No:

701977-08-4

Formula:

$C_{27}H_{25}ClF_3N_3O_2$

Pathway:

GPCR/G Protein

Target:

Cannabinoid Receptor

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Alternative Names:

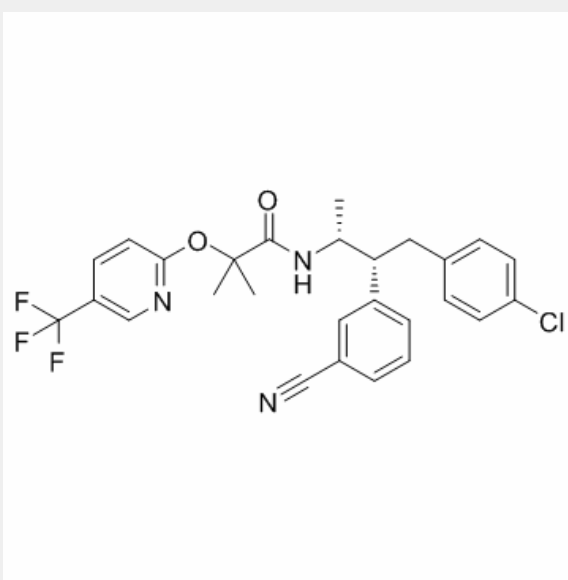

MK0364 (1R,2R)stereoisomer

Observed Molecular Weight:

515.95

Product Description

Taranabant (1R,2R)stereoisomer is the R-enantiomer of Taranabant. Taranabant is a highly potent and selective **cannabinoid 1 (CB1)** receptor inverse agonist.
