

Befetupitant

Catalog No: tcsc6607

Available Sizes

Size: 1mg

Size: 5mg

Size: 10mg

Size: 20mg

Specifications

CAS No:

290296-68-3

Formula:

$C_{29}H_{29}F_6N_3O_2$

Pathway:

Neuronal Signaling;GPCR/G Protein

Target:

Neurokinin Receptor;Neurokinin Receptor

Purity / Grade:

>98%

Solubility:

10 mM in DMSO

Alternative Names:

Ro67-5930

Observed Molecular Weight:

565.55

Product Description

Befetupitant is a high-affinity, nonpeptide, competitive tachykinin 1 receptor (**NK1R**) antagonist.

IC50 & Target: NK1R^[1]

In Vivo: Befetupitant, a different, highly selective NK1R antagonist, is tested in the alkali burn model. Topical application of Befetupitant for 4 days is effective (P[1]).

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
