

Trestolone

Catalog No: tcsc6648

Available Sizes

Size: 1mg

Size: 5mg

Size: 10mg

Size: 20mg

Specifications

CAS No:

3764-87-2

Formula:

$C_{19}H_{28}O_2$

Pathway:

Others

Target:

Androgen Receptor

Purity / Grade:

>98%

Solubility:

DMSO

Alternative Names:

7 α -Methylnandrolone; MENT; NSC 142229; RU 27333

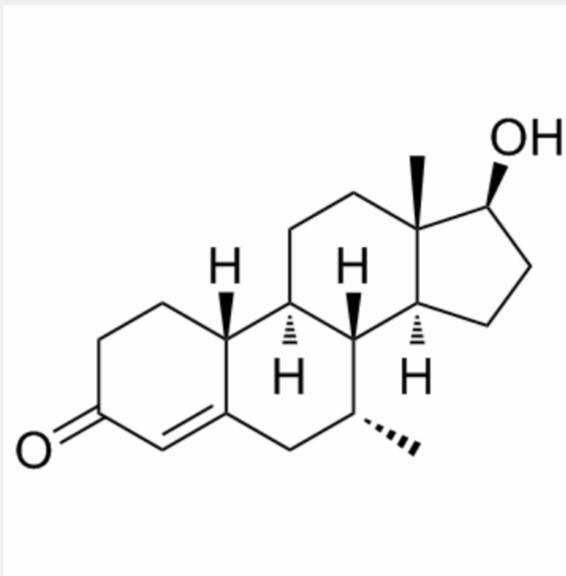

Observed Molecular Weight:

288.42

Product Description

Trestolone is a synthetic anabolic-androgenic steroid (AAS) of the nandrolone (19-nortestosterone) group.

In Vivo: Trestolone is used as trestolone acetate, which is administered via intramuscular injection and acts as a long-lasting prodrug of trestolone.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
