

Epanolol

Catalog No: tcsc7257

Available Sizes

Size: 1mg

Specifications

CAS No:
86880-51-5

Formula:
 $C_{20}H_{23}N_3O_4$

Pathway:
GPCR/G Protein

Target:
Adrenergic Receptor

Purity / Grade:
>98%

Solubility:
10 mM in DMSO

Alternative Names:
Visacor; ICI141292

Observed Molecular Weight:
369.41

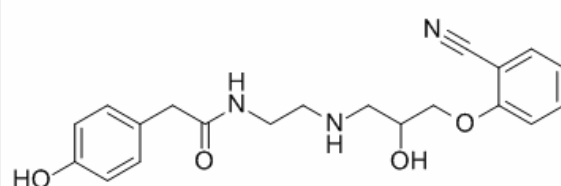

Product Description

Epanolol (Visacor; ICI141292) is a potent **β-adrenoceptor** partial agonist with a greater affinity for **β1-** than β2-adrenoceptors.

IC50 & Target: β1 adrenoceptor^[1]

In Vitro: Epanolol is a novel anti-anginal agent which is a β1-adrenoceptor partial agonist exhibiting selective β1-adrenoceptor

antagonist and selective β 1-adrenoceptor agonist activity^[1].
