

ELISA Kit for Mucin 5 Subtype AC (MUC5AC)

Catalog No: tcue888

Available Sizes

Size: 96T

Specifications

Research Area:

Tumor immunity; Infection immunity; Endocrinology; Pulmonology;

Species Reactivity:

Homo sapiens (Human)

Sample Type:

tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Sensitivity:

The minimum detectable dose of this kit is typically less than 30pg/mL

Detection Range:

78-5000pg/mL

Assay Time:

3h

Detection Method:

Enzyme-linked immunosorbent assay for Antigen Detection.

Tested Application:

ELISA

SwissProt:

P98088

Test Principle

The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated

with an antibody specific to Mucin 5 Subtype AC (MUC5AC). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Mucin 5 Subtype AC (MUC5AC). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mucin 5 Subtype AC (MUC5AC), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Mucin 5 Subtype AC (MUC5AC) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
