

# ELISA Kit for Matrix Metalloproteinase 3 (MMP3)

Catalog No: tcue1017

## Available Sizes

Size: 96T

## Specifications

### Research Area:

Enzyme & Kinase;Tumor immunity;Infection immunity;Cardiovascular biology;

### Species Reactivity:

Mus musculus (Mouse)

### Sample Type:

serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

### Sensitivity:

The minimum detectable dose of this kit is typically less than 5.5pg/mL

### Detection Range:

15.6-1000pg/mL

### Assay Time:

3h

### Detection Method:

Enzyme-linked immunosorbent assay for Antigen Detection.

### Tested Application:

ELISA

### SwissProt:

P28862

## Test Principle

The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated

with an antibody specific to Matrix Metalloproteinase 3 (MMP3). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Matrix Metalloproteinase 3 (MMP3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Matrix Metalloproteinase 3 (MMP3), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of  $450\text{nm} \pm 10\text{nm}$ . The concentration of Matrix Metalloproteinase 3 (MMP3) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
