

ELISA Kit for Transferrin Receptor 2 (TFR2)

Catalog No: tcue1287

Available Sizes	
Size: 96T	
Specifications	
Research Area: Tumor immunity;	
Species Reactivity: Homo sapiens (Human)	
Sample Type: Serum, plasma, tissue homogenates, cell lysates and other biological fluids	
Sensitivity: The minimum detectable dose of this kit is typically less than 0.268ng/mL	
Detection Range: 0.625-40ng/mL	
Assay Time: 3h	
Detection Method: Enzyme-linked immunosorbent assay for Antigen Detection.	
Tested Application: ELISA	
SwissProt:	

Test Principle

Q9UP52

The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated

with an antibody specific to Transferrin Receptor 2 (TFR2). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Transferrin Receptor 2 (TFR2). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Transferrin Receptor 2 (TFR2), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450 \text{nm} \pm 10 \text{nm}$. The concentration of Transferrin Receptor 2 (TFR2) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
