

ELISA Kit for 25-Hydroxyvitamin D3 (HVD3)

Catalog No: tcue1696

Available Sizes

Size: 96T

Specifications

Research Area:

Reproductive science;Genetic science;Nutrition metabolism;Bone metabolism;

Species Reactivity:

Pan-species (General)

Sample Type:

serum, plasma and other biological fluids

Sensitivity:

The minimum detectable dose of this kit is typically less than 0.91ng/mL

Detection Range:

2.47-200ng/mL

Assay Time:

2h

Detection Method:

Enzyme-linked immunosorbent assay for Antigen Detection.

Tested Application:

ELISA

Test Principle

This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to 25-Hydroxyvitamin D3 (HVD3) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled 25-Hydroxyvitamin D3 (HVD3) and unlabeled 25-Hydroxyvitamin D3 (HVD3) (Standards or samples) with the pre-coated antibody specific to 25-Hydroxyvitamin D3 (HVD3). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse

proportional to the concentration of 25-Hydroxyvitamin D3 (HVD3) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of 25-Hydroxyvitamin D3 (HVD3) in the sample.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
