

ELISA Kit for Caveolin 1 (CAV1)

Catalog No: tcue2060

Available Sizes

Size: 96T

Specifications

Research Area:

Tumor immunity;

Species Reactivity:

Canis familiaris; Canine (Dog)

Sample Type:

Serum, plasma, tissue homogenates and other biological fluids.

Sensitivity:

The minimum detectable dose of this kit is typically less than 32pg/mL

Detection Range:

78-5,000pg/mL

Assay Time:

3h

Detection Method:

Enzyme-linked immunosorbent assay for Antigen Detection.

Tested Application:

ELISA

Test Principle

The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Caveolin 1 (CAV1). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to Caveolin 1 (CAV1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Caveolin 1 (CAV1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by

the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Caveolin 1 (CAV1) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
