

ELISA Kit for A Disintegrin And Metalloprotease 17 (ADAM17)

Catalog No: tcue2416

P78536

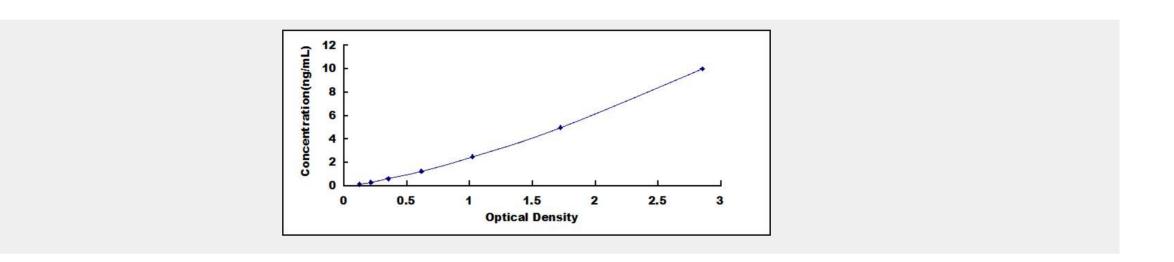

Test Principle

The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to A Disintegrin And Metalloprotease 17 (ADAM17). Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody specific to A Disintegrin And Metalloprotease 17 (ADAM17). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain A Disintegrin And Metalloprotease 17 (ADAM17), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of A Disintegrin And Metalloprotease 17 (ADAM17) in the samples is then determined by comparing the O.D. of the samples to the standard curve.
