

ELISA Kit for Pentosidine (PTD)

Catalog No: tcue2533

Available Sizes

Size: 96T

Specifications

Research Area:

Metabolic pathway;Endocrinology;

Species Reactivity:

Pan-species (General)

Sample Type:

Serum, plasma and other biological fluids

Sensitivity:

The minimum detectable dose of this kit is typically less than 2.13ng/mL

Detection Range:

4.94-400ng/mL

Assay Time:

2h

Detection Method:

Enzyme-linked immunosorbent assay for Antigen Detection.

Tested Application:

ELISA

Test Principle

This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Pentosidine (PTD) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Pentosidine (PTD) and unlabeled Pentosidine (PTD) (Standards or samples) with the pre-coated antibody specific to Pentosidine (PTD). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Pentosidine (PTD) in the sample. After

addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Pentosidine (PTD) in the sample.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
