

ELISA Kit for Transferrin (TRF)

Catalog No: tcue2841

Available Sizes

Size: 96T

Specifications

Research Area:

Tumor immunity;Infection immunity;Immune molecule;

Species Reactivity:

Mus musculus (Mouse)

Sample Type:

serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Sensitivity:

The minimum detectable dose of this kit is typically less than 5.78ng/mL

Detection Range:

12.35-1000ng/mL

Assay Time:

2h

Detection Method:

Enzyme-linked immunosorbent assay for Antigen Detection.

Tested Application:

ELISA

SwissProt:

Q921I1

Test Principle

This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Transferrin (TRF)

has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Transferrin (TRF) and unlabeled Transferrin (TRF) (Standards or samples) with the pre-coated antibody specific to Transferrin (TRF). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Transferrin (TRF) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Transferrin (TRF) in the sample.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
