

ELISA Kit for Neurogranin (NRGN)

Catalog No: tcue2914

Available Sizes

Size: 96T

Specifications

Research Area:

Neuro science;

Species Reactivity:

Homo sapiens (Human)

Sample Type:

serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Sensitivity:

The minimum detectable dose of this kit is typically less than 17pg/mL

Detection Range:

39-10000pg/mL

Assay Time:

2h

Detection Method:

Enzyme-linked immunosorbent assay for Antigen Detection.

Tested Application:

ELISA

SwissProt:

Q92686

Test Principle

This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Neurogranin

(NRGN) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Neurogranin (NRGN) and unlabeled Neurogranin (NRGN) (Standards or samples) with the pre-coated antibody specific to Neurogranin (NRGN). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Neurogranin (NRGN) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Neurogranin (NRGN) in the sample.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
