

ELISA Kit for Anti-Somatostatin Antibody (Anti-SST)

Catalog No: tcue7688

Available Sizes

Size: 96T

Specifications

Research Area:

Tumor immunity;Endocrinology;Hormone metabolism;

Species Reactivity:

Sus scrofa; Porcine (Pig)

Sample Type:

serum, plasma and other biological fluids

Sensitivity:

The minimum detectable dose of this kit is typically less than 1.24ng/mL

Detection Range:

3.12-200ng/mL

Assay Time:

2h, 30min

Detection Method:

Enzyme-linked immunosorbent assay for Antibody Detection.

Tested Application:

ELISA

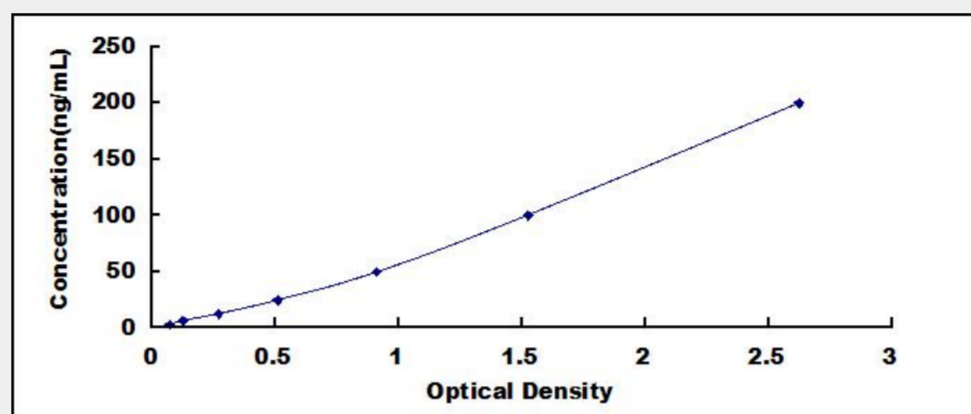

SwissProt:

P01168

Test Principle

The microtiter plate provided in this kit has been pre-coated with an antigen. Standards or samples are then added to the

appropriate microtiter plate wells with a Horseradish Peroxidase (HRP)-conjugated secondary antibody. After TMB substrate solution is added, those wells that contain Anti-Somatostatin Antibody (Anti-SST) will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Anti-Somatostatin Antibody (Anti-SST) in the samples is then determined by comparing the O.D. of the samples to the standard curve.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
