**Product Description**

Goat monoclonal to Rabbit IgG Fc; This antibody reacts to the Fc region of Rabbit IgG. No cross reactivity with human IgG, rat IgG, or mouse IgG.

Western blot of nonreduced(-) and reduced(+) rabbit IgG (20ng/lane), using 0.2ug/mL of RevMab clone RMG02. This antibody reacts to nonreduced rabbit IgG (~150 kDa).

ELISA of IgGs from different species shows RMG02 reacts to the Fc region of rabbit IgG; no cross reactivity with human IgG, rat IgG, or mouse IgG. The plate was coated with 50 ng/well of different IgG. 500 ng/mL, 200 ng/mL, or 50 ng/mL of RMG02 was used as the primary antibody. An alkaline phosphatase conjugated anti-goat IgG as the secondary antibody.

A titer ELISA of rabbit IgG. The plate was coated with different amounts of rabbit IgG. A serial dilution of RMG02 was used as the primary antibody. An alkaline phosphatase conjugated anti-goat IgG as the secondary antibody.
