

# Recombinant SUDV Soluble GP (sGP)

Catalog No: tcip3031

## Available Sizes

**Size:** 100μg

## Specifications

### Application:

ELISA, WB

### Research Area:

Virology

### Form:

Frozen Liquid

### Concentration:

Supplied in PBS (supplemented with glycerol, arginine and glutamic acid) at a concentration of 0.686 mg/mL.

### Purity / Grade:

Column chromatography

### Storage Instruction:

2-3 weeks at -20°C, long term It is recommended to dispense single-use aliquots and store aliquots at -80°C to avoid multiple freeze/thaw cycles

### Relevance:

Recombinant glycoprotein provides a means for antibody development, control protein for testing, and a tool to enhance research.

## Product Description

Mature, recombinant Sudan Virus Soluble Glycoprotein (SUDV sGP) containing a c-terminal HIS tag, is supplied as purified protein. SUDV sGP is produced in mammalian cells and is purified by FPLC.;The theoretical molecular weight of the protein is ~47 kDa. Because of the glycosylated nature of this protein, migration in an SDS-PAGE gel is slowed resulting in a broad, diffuse band representing differing glycosylation forms.

(A) SDS-PAGE of Hla: 1 ug (lane 1) and 5 ug (lane 2). ; (B) Western blot detection of Hla at 5 ng, 10 ng and 50 ng (lanes 1-3), using Taiclone's mouse anti-Alpha Toxin (6C12) monoclonal antibody (cat# tcia123) at 1.0 µg/mL and an anti-mouse IgG-HRP conjugate followed by TMB membrane substrate.

Lysis of rabbit red blood cells by *S. aureus* Hla. Red blood cell lysis was determined by absorbance at OD 416 nm after 30 min incubation at 37°C with Hla. EC 50 values were found to be 0.0322 µg/mL for lot 1805007 (blue circles) and 0.0301 µg/mL for previous lot 1601002 (green circles).

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
