

Mouse Specific HRP/DAB (ABC) IHC Detection Kit

Catalog No: tcrk2083

Available Sizes

Size: 1Set

Specifications

Application:

Immunohistochemistry: 1:50-200

Host Species:

Goat

Concentration:

This kit is ready to use and no dilution is needed. See kit insert for details. Useful for Immunohistochemistry. IHC(P): 1:50-200, IHC(F): 1:50-200, ICC: 1:50-200. Optimal dilutions should be determined by end users.

Storage Instruction:

Store at 4°C for 12 months. Avoid freezing. See user manual for detail instructions.

Alternative Names:

HRP/3,3'-diaminobenzidine Kit Assay, StreptAvidin-Biotin Complex, horseradish peroxidase Conjugated Kit Assay, biotin assay, Anti-Mouse IgM antibody, goat anti-Mouse IgM antibody, colorimetric staining, immunohistochemistry staining

Product Description

Mouse IgG Specific Peroxidase Steptavidin-Biotin Complex Immunohistochemistry Detection Kit is a streptavidin-biotin immunoenzymatic antigen detection system. This system involves the sequential incubation of the sample with an unconjugated primary antibody specific to the target antigen, a biotinylated secondary antibody that reacts with the primary antibody, enzyme-labeled streptavidin, and chromogen substrate. Mouse Specific HRP/DAB (ABC) Detection Kit includes reagents specifically designed for the use in the analysis of antigens in IHC and other immunodetection assays. The provided protocol includes steps for immunohistochemical analysis with low background using 5% BSA blocking reagent, biotinylated secondary antibody, and an enzyme-labeled streptavadin.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
