

# MOLT-4

**Catalog No: tcel160**

## Available Sizes

---

**Size:** 1×10<sup>6</sup>cells/t25culturebottle

---

## Specifications

---

### Application:

transfection

---

### Subculturing:

Cultures can be maintained by the addition of fresh medium or replacement of medium. Alternatively, cultures can be established by centrifugation with subsequent resuspension at 1 to 2×10<sup>5</sup> viable cells/ml. Maintain cell density between 1×10<sup>5</sup> and 1×10<sup>6</sup> viable cells/ml.

---

## Product Description

The patient had received prior multidrug chemotherapy. There is a G→A mutation at codon 248 of the p53 gene. P53 is not expressed. The cells do not produce immunoglobulin or Epstein-Barr virus. The line was originally contaminated with mycoplasma but has been cured with antibiotics.
