

MOLT-4

Catalog No: tcel160

Available Sizes

Size: 1×10⁶cells/t25culturebottle

Specifications

Application:

transfection

Subculturing:

Cultures can be maintained by the addition of fresh medium or replacement of medium. Alternatively, cultures can be established by centrifugation with subsequent resuspension at 1 to 2×10⁵ viable cells/ml. Maintain cell density between 1×10⁵ and 1×10⁶ viable cells/ml.

Product Description

The patient had received prior multidrug chemotherapy. There is a G→A mutation at codon 248 of the p53 gene. P53 is not expressed. The cells do not produce immunoglobulin or Epstein-Barr virus. The line was originally contaminated with mycoplasma but has been cured with antibiotics.
