

FO

Catalog No: tcel337

Available Sizes

Size: 1×10⁶cells/t25culturebottle

Specifications

Application:

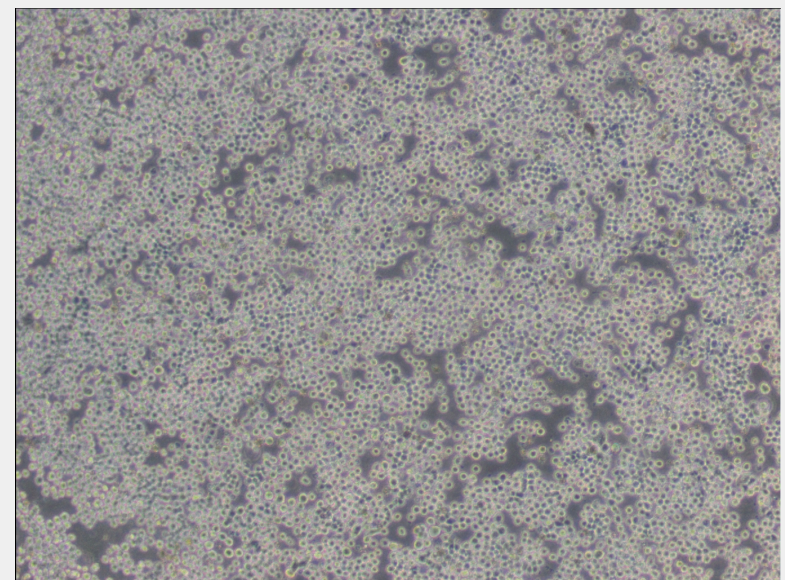

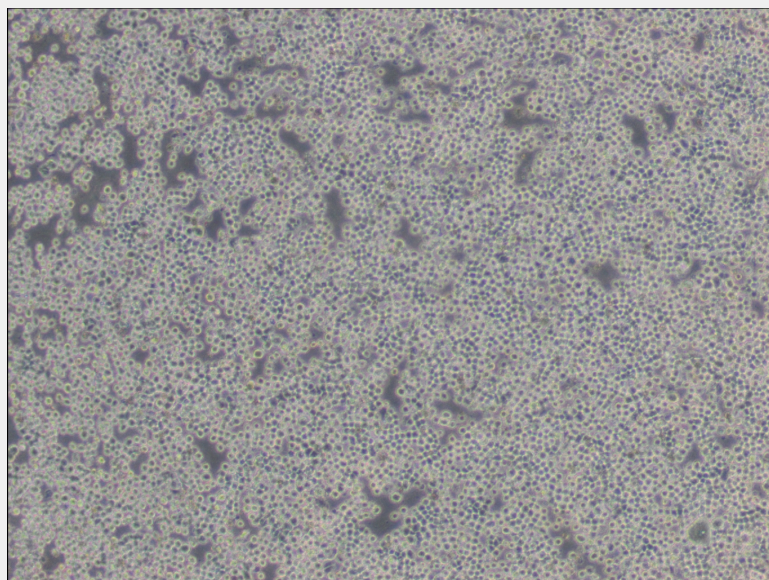

The line can be used as a fusion partner for making B cell hybridomas.

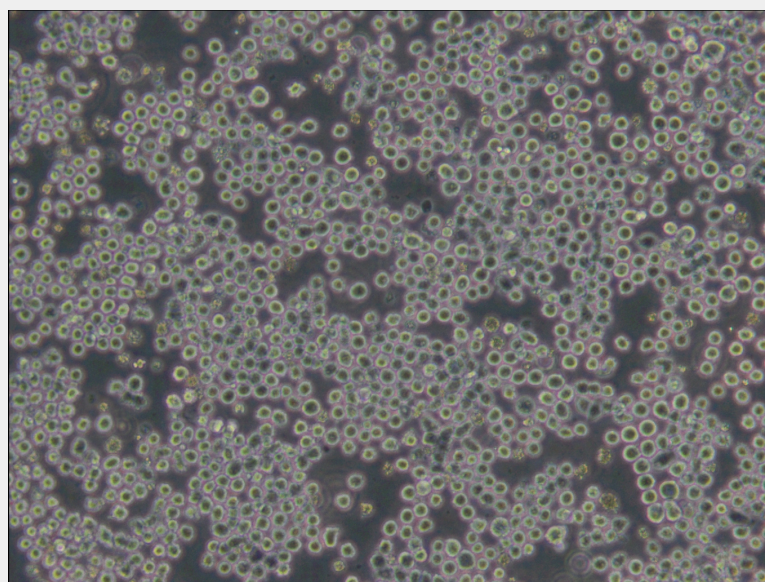

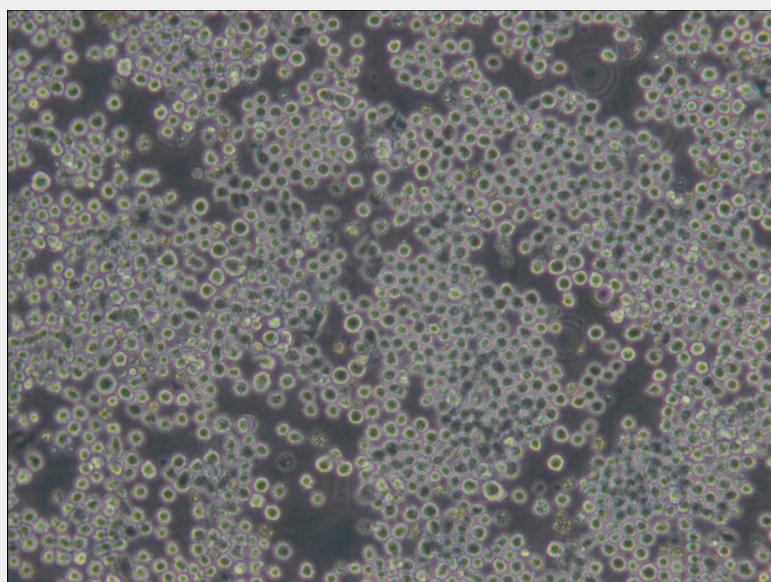

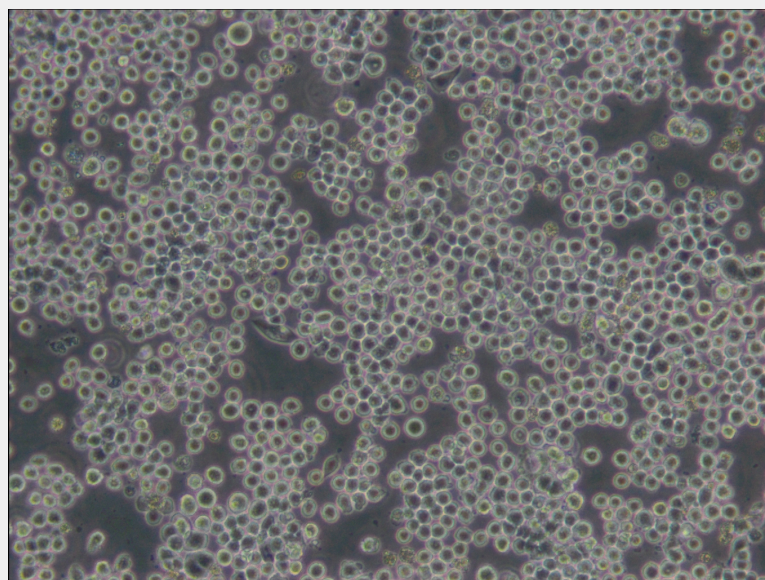

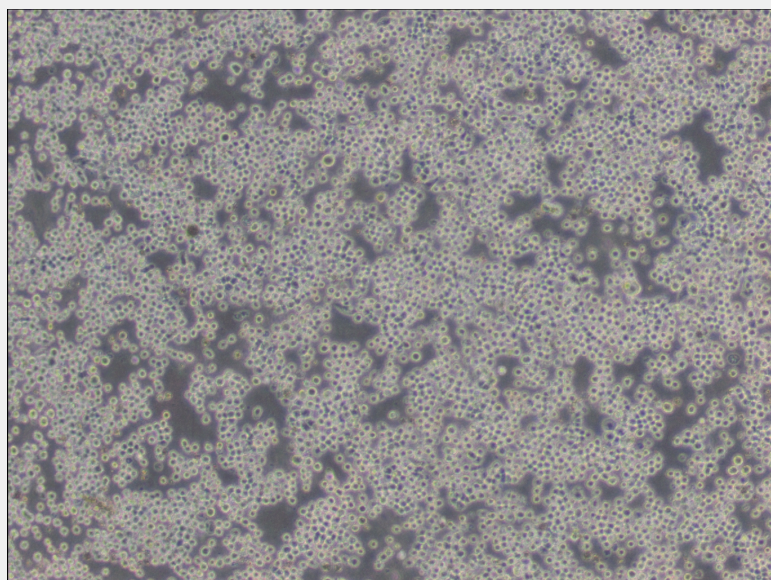

Subculturing:

Cultures can be maintained by the addition of fresh medium or replacement of medium. Alternatively, cultures can be established by centrifugation with subsequent resuspension at the subcultivation ratio of 1:2-1:4.

Product Description

The cells are resistant to 8-azaguanine and do not produce immunoglobulin. Tested and found negative for ectromelia virus(mousepox).

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
