

P3X63Ag8.653

Catalog No: tcel410

Available Sizes

Size: 1×10⁶cells/t25culturebottle

Specifications

Subculturing:

Cultures can be maintained by the addition of fresh medium or replacement of medium. Alternatively, cultures can be established by centrifugation with subsequent resuspension at the subcultivation ratio of 1:2-1:4.

Product Description

The cells are resistant to 8-azaguanine and are HAT sensitive.They can be used as fusion partners for producing hybridomas.The cells have been reported to be cholesterol auxotrophs due to a deficiency in 3-ketosteroid reductase activity.Tested and found negative for ectromelia virus(mousepox).

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
