

# Calcium Chloride Anhydrous Pure 99.9%

Catalog No: tccc45505

## Available Sizes

**Size:** 1Kg

**Size:** 250g

## Specifications

**CAS No:**

10043-52-4

**Formula:**

$\text{CaCl}_2$

**Purity / Grade:**

99,9%

**Storage Instruction:**

Room Temperature

**Calculated Molecular Weight:**

110.98

## Product Description

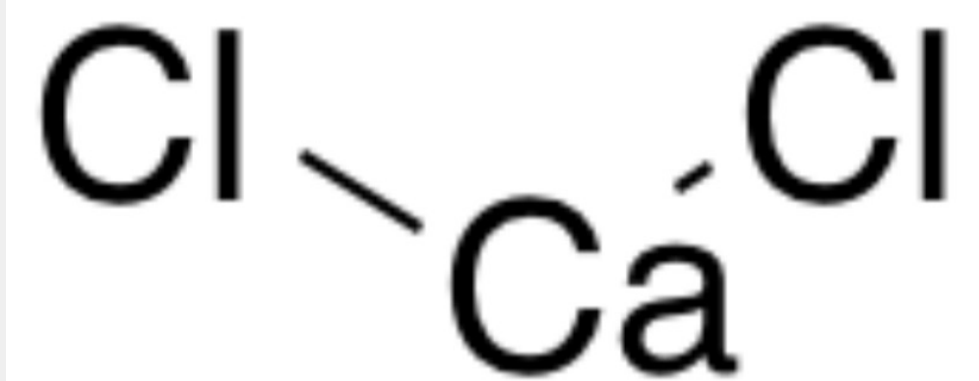

Calcium Chloride ANHYDROUS 99.9% is a chemical compound with formula  $\text{CaCl}_2$ . Our product is almost chemically pure, which makes it ideal for use in analyses, photography, pharmacy, synthesis and crystal making. Product is dry, crystalline powder.

Chemical Grade Definitions:

Pure p.a – High purity analytical reagents. Suitable for laboratory and general use.

Pure – Good quality chemicals. May be used for most laboratory purposes, educational, domestic, craft applications. Not pure enough to be offered for food.

Technical – Good quality for educational, domestic, handicraft, agricultural applications. Not pure enough to be offered for food.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
