

# CloneBead<sup>®</sup> Carboxylate Microspheres 0.05 $\mu$ m

Catalog No: tcpt7937

## Available Sizes

---

**Size:** 10ml

---

## Specifications

---

### Application:

Capable modification Coating with antibodies, antigens, peptides, or nucleic acid probes.

---

### Form:

Liquid

---

### Concentration:

2.5% solids (w/v)

3.64 x 10<sup>e14</sup> particles/ml

---

### Storage Instruction:

store at 4°C; Freeze may damage this product!!

---

## Product Description

CloneBead<sup>®</sup> Carboxylate Microspheres are microspheres of monodisperse polystyrene containing with surface carboxyl groups. Can be used for several experiment such as covalent binding of proteins to the bead surface.

Our microspheres packaged size 2.5% solids (w/v) in aqueous suspensions.

All products are for RESEARCH USE ONLY. Not for diagnostic & therapeutic purposes!
